## Professional Summary

---

Cybersecurity Engineer with experience in web application security testing, vulnerability assessment, and security automation. Currently working on Experian security testing engagements at Tata Consultancy Services using Burp Suite, Nmap, and Wireshark.

## Experience

---

### Tata Consultancy Services (TCS)

Jul 2025 – Present

*Systems Engineer – Application Security Testing*

*Experian*

- Conducted security testing for 10+ non-PCI applications including web applications, APIs, and network components.
- Performed retesting and remediation validation for 20+ PCI and non-PCI applications.
- Utilized security tools including Burp Suite, Nmap, Wireshark, and Postman to identify vulnerabilities.
- Performed API security testing and traffic analysis to identify potential security issues.
- Collaborated with development teams to validate vulnerability fixes and improve application security posture.

### Tata Consultancy Services (TCS)

Mar 2025 – Apr 2025

*Security Testing Intern*

- Assisted in enterprise web application and API security testing workflows.
- Supported vulnerability discovery using Burp Suite and network scanning tools.
- Participated in vulnerability validation and remediation verification processes.

## Security Projects

---

### ReconForges – Automated Reconnaissance Framework

🐙 GitHub

- Developed a modular Python-based reconnaissance automation framework for penetration testing workflows.
- Integrated tools including Subfinder, Amass, httpx, Katana, Nmap, WhatWeb, and Nuclei.
- Automated subdomain discovery, web crawling, port scanning, technology fingerprinting, and vulnerability scanning.
- Designed structured pipelines to streamline reconnaissance in security assessments.

### Secure File Management System with Facial Recognition

🐙 GitHub

- Developed a secure file management system with facial authentication using OpenCV and deep learning.
- Implemented encrypted storage and secure authentication mechanisms.
- Achieved 95%+ authentication accuracy using a Siamese CNN model.

## Security Skills

---

- **Application Security:** Web Application Security Testing, API Security Testing, Vulnerability Assessment
- **Security Tools:** Burp Suite, Nmap, Wireshark, Postman
- **Offensive Security Tools:** Subfinder, Amass, httpx, Katana, Nuclei
- **Programming:** Python, JavaScript, C/C++, SQL
- **Systems:** Linux, Git

## Security Platforms

---

- TryHackMe – Top 15% ranking with 46+ rooms completed
- HackTheBox – Active learner solving penetration testing labs

## Certifications

---

- **Cisco Certified Network Associate (CCNA)** — Cisco
- **Microsoft Certified: Security, Compliance, and Identity Fundamentals** — Microsoft

## Education

---

Kalinga Institute of Industrial Technology, Bhubaneswar

2021 – 2025

*B.Tech Computer Science & Engineering*

*CGPA: 8.21*
